

Assignment:1

Assignment 1: Ensure the script checks if a specific file (e.g., myfile.txt) exists in the current directory. If it exists, print "File exists", otherwise print "File not found".

Ans:

The bash code for that is as follow:

```
#!/bin/bash
```

```
filename="myfile1.txt"
```

```
if [[ -e "$filename" ]]; then
```

```
    echo "file exist"
```

```
else
```

```
    echo "not exist"
```

```
fi
```

input outout snapshots for file found or file not found
